  - o General assistance and evacuation of ill or injured athletes from other sites (warm-up/training/hotels)
  - o LOC/VIP/Media/Team officials/Volunteers' medical assistance and evacuation routes
  - o Spectators medical assistance and evacuation routes

---

<sup>1</sup> Athletes Village or Team Hotels must have a physio space for teams, and access to medical care through a 24h phone contact with LOC doctor

<sup>2</sup> Though these areas do not require a proper medical centre setup, provision for medical support should be thought and planned namely by contact and referral

<sup>3</sup> Even if LOC is not responsible for spectators' care, it should be aware and work closely with national regulations and stadium safety plan

### Medical plan for extreme conditions

- Weather (water and ice provision, WBGT monitorisation, etc)
- infection<sup>4</sup>

### Hospital or clinics (for referral and emergency evacuation)<sup>5</sup>

- Location (time to reach)
- Specialities availability
- payment and insurance options

### Pharmacy

- name, location, and contacts
- Local regulations (including drugs importation and declaration procedures)

---

<sup>4</sup> a COVID-19 Infection Control Medical Plan shall be developed separately as part of the event sanitary protocol

<sup>5</sup> a clear communication line should be established between LOC medical support and these facilities, to speed up these referrals as well as keep constant track of the outcome.
